ESKO AIR8 8500 DUAL AIRLINE BACK-MOUNTED ADAPTER KIT

AIR8®

8500

The Esko AIR 8500 dual airline back-mounted adapter kit is designed for use with AIR8 twin filter respirators: 8900 Full Face Mask.

FEATURES

- Dual Airline, back-mounted for easy use
- Equipped with flow control valve, which can fine-tune the air volume
- Optional to Gas Filter for Escape
- Flow regulating valve
- Valve, adapter and belt included

CERTIFICATIONS

Complies with EN 14594:2018

APPLICATIONS

When the concentration of hazardous substance in the workplace exceeds 100 times the OEL*(Occupational Exposure Limit), a supplied-air respirator with a full-face mask, helmet or hood or a powered air-purifying respirator with filters must be used for protection. The long hose supplied-air breathing system, as a type of supplied-air respirator, allows the user to breath compressed air transported from a remote source, providing a high level of protection and adaptability to various complex working environments.
